Question: Write a program which print all characters by using loop?

IN JAVA:

> SOURCE CODE:

```
int count=0;
    for (int i = 0; i < 255; i++) {
        System.out.print((char)i+" ,");
        count++;
        if(count==35){
            System.out.println();
            count=0;
        }
    }</pre>
```

```
package javaapplication6;
     public class JavaApplication6 {
       public static void main(String[] args) {
         int count=0;
7
         for (int i = 0; i < 255; i++) {
8
           System.out.print((char)i+",");
9
           count++;
           if(count==35){
.1
             System.out.println();
.2
             count=0;
.3
4
.5
                                                                                    ,8 ,9 ,:
                                                         ,1
                                                 ,R
                                                     ,S
                                                        , T
